

Asset Vault

The KSI Asset Vault provides smart storage and centralized monitoring for high value assets.

Built on touch memory technology, each asset assumes a unique identity through an attached KSI Smart Button. Our GFMS software restricts and monitors user access while tracking usage for detailed reporting.

Adjustable shelving provides customizable space for tools, electronics, weapons, narcotics or even additional sealed containers.

Features

- Web enabled for remote access
- PIN, card or biometric verification options are available
- Customizable shelving options fit with cabinet cavity measuring 33 $\frac{3}{4}$ "wx36 $\frac{3}{8}$ "hx12"d
- Secures up to 60 assets
- KSI Asset Vault integrates with your existing GFMS products.
